

FOKKER S.14

....are sitting side by side....

HERE, AT LAST, IS AN AIRCRAFT THAT IS *designed* AS A JET-TRAINER!

In Fokker's S. 14, with Rolls Royce Derwent jet - engine, instructor and pupil are sitting side by side. It provides, as these figures show, for the pupil, a well calculated step between his advanced-trainer and the operational trainer and fighter he is to fly tomorrow.

SPEED AND WING LOADING OF AEROPLANES FOR ADVANCED TRAINING

	Average for piston engined trainers	Fokker S. 14	Average for converted jet fighters
Max. speed mph	260	435	560
Wing loading lb/sq.ft.	26	32,2	45
